

VELOOP Rewards – Frontend Development Task Assignment

Task 0G – Rewards, Engagements Utility Banner/Card Redesign

Assigned Components

For this task, you are required to completely redesign and redevelop the following five VELOOP Rewards banners/cards:

1. **Leaderboard Banner**
2. **Watch Ads Earn Banner**
3. **Contact Us Banner**
4. **Follow s Earn Banner**
5. **Daily Bonus Banner**

These components should follow the same design standards established for the previous banner assignment while having their own visual identity and purpose.

1. Project Objective

The objective of this task is to create **premium, modern, interactive, trustworthy, and highly engaging banners/cards** that fit naturally into the VELOOP Rewards platform.

Each banner should immediately communicate:

- What the feature is
- What benefit it provides
- What the user can do
- Why the user should interact with it

The final UI should feel like a combination of:

Modern Fintech + Rewards Platform + Gamification + Premium SaaS

The design should encourage users to return to the platform and interact with different features.

2. Important Global Banner Standards

These requirements apply to **all five banners**.

They should also be treated as the standard for future VELOOP Rewards banner/card assignments unless a future task explicitly specifies otherwise.

3. Body Background

The application body background must remain:

#161827

Every banner must complement this background.

The card should appear visually separated from the body without looking disconnected from the platform.

4. Width Requirement

Every banner/card must use:

100% available width

The banner should adapt to the available width of its parent/container on every screen size.

Do not use a small fixed-width card on desktop.

The banner should feel like a major feature section rather than a tiny promotional box.

5. Height Requirements

Follow these height ranges.

Laptop / Desktop

Minimum: 410px

Maximum: 450px

Tablet

Minimum: 380px

Maximum: 540px

Mobile

Minimum: 330px

Maximum: 520px

Important

The height should be responsive.

Do not blindly use one fixed height for every device.

The content, illustration, typography, and CTA should adapt naturally while staying within the specified range.

6. Visual Design Direction

Every banner should feel:

- Premium
- Modern
- Trustworthy
- Reward-focused
- Interactive
- Engaging
- Fintech-inspired
- Clean
- Professional
- Branded

The visual quality should give users confidence that VELOOP Rewards is a serious platform.

7. Color Guidelines

The primary body background is:

#161827

Use complementary colors such as:

- Deep navy
- Soft blue
- Gold
- Warm yellow
- Silver
- White
- Muted purple
- Soft neutral colors

You may use gradients, but they must be subtle.

Avoid:

- Neon colors
- Rainbow gradients
- Excessive glow
- Flashing colors
- Gaming-style UI
- Extremely bright backgrounds
- Excessive glassmorphism

The target is:

Premium fintech/rewards experience — not a gaming website.

8. Illustration Requirement

Every banner MUST contain a **large visual element**.

Possible visual elements:

- Custom illustration
- SVG illustration
- 3D-style illustration
- Large icon composition
- Lottie animation
- Product mockup
- Reward visualization
- Character illustration
- Feature-related image

The visual should immediately help the user understand the feature.

For example:

A user should see the **Leaderboard** banner and immediately understand:

"I can compete with other users and climb the rankings."

Likewise, the **Watch Ads Earn** banner should visually communicate:

"I can watch advertisements and earn VEs."

G. Animation Requirement

Every banner should include at least one meaningful interaction or animation.

Possible examples:

- Floating elements
- Coin animation
- Progress animation
- Hover animation
- Button interaction
- Animated icon
- Moving ranking positions
- Reward counter
- Soft background movement
- Illustration animation
- Smooth entrance animation

Animations must be:

- Smooth
- Lightweight
- Professional
- Purposeful

Do not use animations simply for decoration.

10. Banner 01 – Leaderboard

Purpose

The Leaderboard banner introduces the platform's competitive/gamified ranking experience.

It should motivate users to participate more actively and improve their position on the leaderboard.

Suggested Heading

Climb the Leaderboard

Alternative:

Rank Higher. Earn More.

Suggested Description

Complete activities, earn rewards, gain XP, and compete with other users to climb the leaderboard.

Use the actual approved leaderboard rules if they are already implemented.

Suggested Visual

The illustration can include:

- Podium
- Trophy
- Crown
- Gold/Silver/Bronze medals
- Ranking cards
- User avatars
- Rising chart
- XP
- Coins

The visual should communicate **competition + achievement + rewards**.

Possible UI Elements

Include:

#01

#02

#03

Example:

 User A 12,450 VEs

 User B 11,820 VEs

 User C 10,970 VEs

Use dummy data during development.

CTA

Possible:

View Leaderboard →

or

Check Rankings →

Interaction Ideas

- Ranking cards moving slightly
 - Trophy animation
 - Rising position animation
 - XP counter
 - Medal glow
 - Hovering user cards
-

11. Banner 02 – Watch Ads Earn

Purpose

This banner promotes the **Watch Ads Earn** feature.

Users can watch eligible advertisements and receive VEs according to the applicable reward rules.

Suggested Heading

Watch Ads. Earn VEs.

Alternative:

Watch s Get Rewarded

Description

Watch eligible advertisements and earn VEs for completing available ad activities.

Do not promise a fixed earning amount unless the amount is officially approved.

Visual

Use a large visual containing:

- Video/TV icon
- Play button
- VE coins
- Reward animation
- Advertisement screen
- Wallet
- Coin burst

The user should immediately understand:

Watch → Complete → Earn

CTA

Watch s Earn →

Interaction Ideas

- Play button animation
 - Coin movement
 - Reward counter
 - Video card hover
 - Animated CTA
 - Coin burst after interaction
-

12. Banner 03 – Contact Us

Purpose

The Contact Us banner should make users feel that VELOOP Rewards is accessible and provides real support.

The banner should communicate:

We're here to help.

This is particularly important for building trust.

Suggested Heading

Need Help? We're Here.

Alternative:

We're Always Happy to Help

Description

Have a question, concern, or need assistance? Get in touch with the VELOOP Rewards team.

Visual

Use an illustration involving:

- Support agent
 - Chat bubble
 - Headset
 - Message
 - Email
 - Help center
 - Friendly customer-support illustration
-

CTA

Possible:

Contact Support →

or

Talk to Us →

Support Information

You may display:

Email

velooprewardsofficial@gmail.com

You may also provide placeholders for:

- Direct Message
- Help Center
- Support Ticket

Interaction Ideas

- Chat bubble animation
 - Floating message icons
 - Email icon movement
 - CTA hover
 - Support illustration animation
-

13. Banner 04 – Follow s Earn

Purpose

The Follow C Earn banner encourages users to follow VELOOP Rewards on official social channels and participate in eligible social engagement campaigns.

The exact reward should be based on the current campaign rules.

Suggested Heading

Follow s Earn

Alternative:

Stay Connected. Get Rewarded.

Description

Follow VELOOP Rewards on our official social channels and discover exclusive updates, campaigns, and eligible rewards.

Social Platforms

Depending on the currently supported channels, the design may include:

- Instagram
- Facebook
- LinkedIn
- YouTube
- X
- Telegram

Only display channels that are officially active.

Visual

Use:

- Social media icons
- Phone
- Social profile cards
- Reward coins
- Notification
- Follow button
- Celebration elements

The illustration should communicate:

Follow → Engage → Reward

CTA

Possible:

Follow & Earn →

or

Explore Our Channels →

Important

Do not imply that users automatically receive a reward merely for following a social account unless that specific reward campaign is active.

The banner should use wording such as:

Participate in eligible social campaigns and unlock rewards.

when appropriate.

14. Banner 05 – Daily Bonus

Purpose

The Daily Bonus banner promotes the platform's recurring bonus opportunities.

It should encourage users to return regularly and claim eligible rewards.

Suggested Heading

Your Daily Bonus Is Waiting

Alternative:

Come Back. Claim More.

Description

Check in regularly and claim your available daily bonus before the opportunity resets.

Use the actual reward rules currently implemented on the platform.

Visual

Use:

- Gift box
 - Calendar
 - Coins
 - Reward chest
 - Streak indicator
 - Daily reward card
 - Celebration graphics
-

Possible UI

Example:

Today's Bonus

+25 Gems

Available Now

Use dummy data for development.

CTA

Claim Bonus →

or

Interaction Ideas

- Gift box opening
 - Coin animation
 - Calendar progression
 - Reward counter
 - Button glow
 - Daily progress animation
-

15. Distinct Visual Identity

Although all five banners must belong to the same VELOOP Rewards design system, they should **not look like five copies of the same component**.

For example:

Banner	Visual Direction
Leaderboard	Trophy / Ranking / Competition
Watch Ads	Video / Coins / Earning
Contact Us	Support / Chat / Trust
Follow C Earn	Social / Community / Rewards
Daily Bonus	Gift / Calendar / Daily Reward

The user should immediately know which feature they are looking at.

16. Content Hierarchy

Every banner should communicate four things:

1. What is this?

Feature name.

2. Why should I care?

Main benefit.

3. What can I earn/get?

Reward or value proposition, where applicable.

4. What should I do?

Clear CTA.

Keep the text concise.

Do not turn the banner into a blog article.

17. CTA Requirements

Every banner must contain a prominent CTA.

Examples:

- View Leaderboard
- Watch C Earn
- Contact Support
- Follow C Earn
- Claim Bonus

CTA requirements:

- Clear
 - High contrast
 - Touch-friendly
 - Hover state
 - Active state
 - Focus state
 - Smooth transition
-

18. Empty Space Management

Empty space must look intentional.

Do not leave large unused areas simply because there is not enough content.

Use:

- Large illustration
- Reward visualization
- Decorative elements
- Feature-related graphics
- Progress indicators

However:

Do not add meaningless content simply to fill space.

The design should feel spacious but purposeful.

1G. Responsive Design

All five banners must be responsive.

Mobile

Width:

100%

Height:

330px – 520px

Tablet

Width:

100%

Height:

380px – 540px

Laptop/Desktop

Width:

100%

Height:

410px – 450px

20. Mobile Layout

A horizontal desktop banner can transform into a vertical composition on mobile.

Example:

Illustration

Heading

Description

Reward

CTA

The visual must remain prominent.

Do not make the illustration tiny just to preserve the desktop layout.

21. Tablet Layout

Use the available space intelligently.

Possible layouts:

- Two-column
- Centered
- Illustration + content
- Split card

Avoid oversized empty sections.

22. Desktop Layout

Use the full width efficiently while keeping the content balanced.

Avoid:

- Tiny content inside huge banners
 - Excessive whitespace
 - Overly large typography
 - Stretched illustrations
-

23. Background Design

All banners must complement:

#161827

You may use:

- Deep navy
- Slightly lighter card surface

- Soft gold
- Muted blue
- Silver
- Subtle gradients
- Radial highlights

Use gradients carefully.

The design should feel:

Elegant and premium rather than flashy.

24. Icons s Illustrations

Use:

- Lucide React
- React Icons
- SVG
- Custom illustrations
- Lottie where appropriate

Icons should support the content rather than randomly decorate the interface.

25. Technology Stack

Use:

- React.js
 - Vite
 - Bootstrap
 - CSS Modules (.module.css)
 - React Hooks
 - React Icons
 - Lucide React
 - Other relevant React libraries where appropriate
-

26. Component Architecture

Use a clean, reusable structure.

Suggested:

src/

|

├── components/

| ├── LeaderboardBanner/

| ├── WatchAdBanner/

| ├── ContactBanner/

| ├── FollowEarnBanner/

| └── DailyBonusBanner/

|

├── assets/

├── hooks/

├── utils/

├── pages/

└── styles/

Do not place everything inside one large component.

27. Reusable Banner Architecture

You may create a reusable banner component if appropriate.

For example:

RewardFeatureBanner

with configurable:

- Title
- Description
- Illustration
- CTA
- Reward
- Theme
- Animation
- Route

28. Dummy Data

Backend integration is not required.

Use dummy values during development.

Examples:

Leaderboard

#1

12,450 VEs

Watch Ads

+38 VEs

Daily Bonus

+25 Gems

Follow s Earn

+500 SVEs

These are **development examples only** and should not be treated as official reward promises.

2G. Animation s Interaction

Each banner must include meaningful interaction.

Hover

- Card elevation
- Illustration movement
- CTA transition
- Border transition

Click

Navigate to the relevant route.

Touch

Ensure interactions work naturally on mobile.

30. Performance

Animations should be lightweight.

Avoid:

- Large video backgrounds
- Unoptimized images
- Excessive particle systems
- Heavy libraries without purpose

Optimize images and animations before deployment.

31. Accessibility

Ensure:

- Proper contrast
 - Readable text
 - Keyboard-accessible buttons
 - Visible focus states
 - Accessible labels
 - Appropriate alt text
 - Touch-friendly controls
-

32. Local Development Requirement

The project must be developed and tested on your **local system** first.

You are expected to:

1. Set up the project.
2. Build all five banners.
3. Test every screen size.
4. Test animations.
5. Test buttons and routes.
6. Fix console errors.
7. Optimize assets.
8. Create the production build.
9. Push the project to GitHub.
10. Deploy the project.

33. GitHub Requirement

Create a dedicated repository.

The repository should include:

- Complete source code
- Components
- CSS Modules
- Assets
- README.md
- Configuration files

Do not upload:

- node_modules
 - .env
 - API keys
 - Passwords
 - Unnecessary files
-

34. Deployment Requirement

Deploy the final project using:

- **Vercel**, or
- **Netlify**

Vercel is recommended.

Verify:

- All banners load correctly.
 - All animations work.
 - Responsive design works.
 - Buttons work.
 - No console errors remain.
-

35. README.md

A professional README.md is mandatory.

Include:

- Project Title
- Project Overview
- Banner List
- Features
- Technology Stack
- Installation
- Development Commands
- Folder Structure
- Responsive Breakpoints
- Animation Details
- Screenshots
- Live Demo
- GitHub Repository
- Author

36. Final Deliverables

You must submit:

GitHub Repository

The complete source code.

Live Deployment

Vercel or Netlify deployment link.

README.md

Complete project documentation.

37. Project Timeline Submission Deadline

To ensure smooth project execution and timely reviews, the assigned task must be completed within the specified timeline.

Timeline

Project Assigned On: 01 September 2026

Project Start Date: 01 September 2026

Submission Deadline: 25 September 2026

Submission Time: 5:30 P.M. (IST)

38. Final Submission Checklist

Before submitting, make sure:

- Leaderboard Banner completed
- Watch Ad C Earn Banner completed
- Contact Us Banner completed
- Follow C Earn Banner completed
- Daily Bonus Banner completed
- All banners use 100% available width
- Desktop height: 410–450px
- Tablet height: 380–540px
- Mobile height: 330–520px
- Body background remains compatible with #161827
- Large illustration/visual included in every banner
- Meaningful animation included
- No neon/flashy colors
- Premium fintech aesthetic maintained
- Empty spaces handled properly
- Mobile tested
- Tablet tested
- Laptop tested
- Large screen tested
- CTA interactions completed

- Code developed locally
- GitHub repository created
- README.md completed
- Vercel/Netlify deployment completed
- GitHub link ready
- Live deployment link ready

Final Design Direction

Do not treat these as ordinary promotional cards.

Each banner is a **mini product experience**.

A user should understand the purpose of each banner within a few seconds:

Leaderboard:

I can compete, rank higher, and achieve more.

Watch Ads Earn:

I can watch eligible ads and earn VEs.

Contact Us:

I can reach the VELOOP Rewards team when I need help.

Follow s Earn:

I can stay connected and participate in eligible social rewards.

Daily Bonus:

I have a reason to come back and claim my daily reward.

The final result should feel like it belongs to a **trusted, premium rewards and fintech platform**, while remaining visually consistent with VELOOP Rewards and the #161827 application background.

Creativity is welcome. Better ideas are encouraged. Quality, clarity, trust, and user engagement should always come before unnecessary visual effects.

DESIGN IS ADDED BELOW BUILD SAME AS IT IS!

01 COMPETITION STAGE ACTIVE

Rank Higher. Earn More.

Complete activities, earn rewards, gain XP, and compete with other users to climb the leaderboard.

 Current pool: **50,000 VEs** in prizes
